

ADARSH SRIVASTAVA

Full-Stack Software Developer · Node.js · React.js · PostgreSQL · Microservices
adarshsrivastavakv@gmail.com | 9569435796 | Lucknow, Uttar Pradesh

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 1.5+ years of professional experience building scalable, production-ready applications. Specialized in Node.js microservices architecture, React.js frontends, and PostgreSQL/MongoDB database design. Proven track record delivering enterprise SaaS platforms with multi-tenancy, real-time systems, payment integrations, and containerized deployments. Passionate about clean architecture, developer experience, and shipping impactful products.

TECHNICAL SKILLS

Backend	Node.js, Express.js, REST API, Microservices, WebSocket, Socket.io, RabbitMQ, JWT, OAuth 2.0
Frontend	React.js (Vite), JavaScript (ES6+), HTML5, CSS3, Bootstrap, Axios, Dynamic Module Federation
Databases	PostgreSQL (Prisma ORM), MongoDB (Mongoose), MySQL
DevOps	Docker, Docker Compose, Nginx, Git, GitHub, Linux CLI, Postman
Payments	Braintree, Razorpay, PayPal — subscription billing, webhooks
Integrations	Twilio, Google OAuth, Braintree
Architecture	Multi-tenancy, API Gateway, SSO,

WORK EXPERIENCE

Full-Stack Developer (Node.js + React + PostgreSQL)Jan 2024 – Present

Sprinx Technolabs · Lucknow · Remote

Project: Sprinx — Enterprise SaaS Marketplace Platform (Full-Stack, Microservices)

- Designed and built a multi-tenant SaaS marketplace from scratch using a microservices architecture with **11 independent services**: auth, billing, tenant, user, marketplace, API gateway, analytics, audit, notifications, admin, and product.
- Implemented per-product subscription billing with **Braintree** — including Drop-in UI checkout, payment method vaulting, webhook handlers for 6 event types, and an auto-renewal background job ensuring zero missed renewals.
- Built a **dynamic module system** where products are independently deployable plugins, each with their own frontend, backend, pricing, and config schema — auto-registered at runtime via manifest files (Magento-inspired plugin architecture).
- Enforced **strict multi-tenant data isolation** across all services using Prisma ORM scoped queries and JWT-based tenant context propagation through the API gateway.
- Containerized the full stack with **Docker Compose** and configured Nginx as a reverse proxy to route traffic across all microservices, supporting independent scaling.
- Built Admin Panel and Tenant Portal UIs in **React.js (Vite)** with dynamic module federation using `import.meta.glob` for lazy-loaded product UIs.
- Designed RESTful APIs and implemented JWT-based auth with role/permission systems and **centralized SSO** enabling single login across all platform products.

EDUCATION

Bachelor of Computer Applications (BCA)*2022 – Present*

Babasaheb Bhimrao Ambedkar University (Central University)

Intermediate (12th) — Science with Mathematics*2022*

Central Board of Secondary Education (CBSE)

High School (10th)*2020*

Central Board of Secondary Education (CBSE)

CERTIFICATIONS

- Backend Development Course — Physics Wallah | December 2024
- Python for Beginners — Physics Wallah | November 2024
- Core Java Certification — Physics Wallah
